Website Portfolio Idea

Oliver Fong

Autumn 2022

I have plans to make a website that is essentially just a portfolio. These five skills need to be displayed:

1. Web Design

2. "Feature" Implementation with Javascript

3. Photography Portfolio

4. Woodworking Portfolio

5. Coding Projects that I'm proud of

Given this, we can find that there needs to be 3 tab headers with an "Introduction" page as the home click. One tab for photography, one for woodworking, and the last for coding.
